

Marquee wall, roof and linings cleaning service

TAE Marquee Cleaning offers the solution for cleaning and drying your PVC sheets and marquee linings. Our brand new system offers an advanced cleaning performance that compared to washing by hand brings amazing results for your marquee roofs and walls in a short time frame. We have also invested in industrial washing machines and dryers that keep your linings looking event ready for another busy season.

With over 25 years in the Marquee industry we understand the deadlines involved with events and will ensure your PVC sheets and linings are turned around quickly. Based on the border of North Wales, we have strong transport links to cover all of the North West which makes delivery and collection of your walls, roofs and linings simple.

How do you clean my marquee roofs and walls?

1. Leave your dirty marquee roofs and walls with our skilled team at TAE Marquee Cleaning.

2. Pre soak in tank with special PVC chemical then pre brush down as covers enter machine.

3. High speed brushes, thoroughly scrub the sheets before rinsing off chemicals.

4. Drying ducts dry roofs and walls as they slowly leave machine looking clean and ready for your next event.

5. Inspection and folding before final dry. Roofs and walls may also need repairs which we can report and quote separately.

6. Our team will call you when your roofs and walls have been cleaned to arrange collection or delivery if required.

How do you clean my marquee linings?

Our advanced industrial washing and drying machines provide professional cleaning for your marquee linings which leaves them looking ready for a busy season of events.

Here at TAE Marquee Cleaning we have the facilities to wash and dry linings from 3m up to 15m and all linings are finished to the highest standard and carried out in a smoke clean environment to give the best possible results.

Just deliver your equipment to our depot in North Wales and we will call you to collect when we have finished. Alternatively we can collect and return to your location, subject to area and turn around times. Please contact us today for a quote.

Alternatively, we can collect and deliver subject to location and turn around times.

Frequently Asked Questions

What services do you offer?

Cleaning and drying of PVC sheets and marquee linings.

Is it possible to clean off mould from the PVC sheets?

Whilst our powerful machine brushes can break down surface mould, it can be impossible to remove ingrained mould within the canvas itself.

Do you clean canvas?

The machine is unable to wash canvas, we would have to do this by hand or pressure washer.

Do you press linings?

No - we wash and dry the linings but cannot guarantee they will have no creases.

What is the largest and smallest items that can go through the machine?

The machine is 6m wide and we can wash and dry up to around 40m. This depends on the thickness of the material.

How do I get my stock to you?

Most of our customers bring their equipment to our depot in North Wales, we will give you a call to say when it's ready to collect.

Alternatively we can collect and deliver to your location. Ask us for a transport quote.

Do you have insurance and if so what does it cover?

We are fully insured - if any of your equipment is either stolen or damaged at our premises we are covered.
